

Production Supervisor

Contact: Barbara R. Murray, Executive Director | 757.401.8259 | brmurray.accelerate@aapa-ports.org

Production supervisors oversee product manufacturing or assembly processes. They organize and monitor employee workflow, communicate production goals, evaluate results, and manage employees. A structured **Production Supervisor** apprenticeship program can help your company recruit new hires or upskill incumbents as well as students entering the workforce who have completed relevant programs in business and management. An apprenticeship program provides workers with paid, mentor-led training in industry-validated skills and competencies, and provides employers with a clear pathway leading production supervisors to higher-level positions such as operations manager, distribution center manager, or terminal manager.

ACCEraterate Apprenticeship can help you develop a customized apprenticeship program to train production supervisor. The production apprenticeship model provides a competency-based program which includes foundational workplace-based training and related instruction in the following areas:

- Customer service
- Workplace safety and security
- Personnel and human resources
- Strategic planning
- Project management

ACCEraterate Apprenticeship can help you develop a partnership with a local community or technical college providing courses which may provide your apprentices with college credit toward an academic certificate or degree. In addition we can identify additional federal, state or local sources of funding and support to help offset program costs and ensure long-term sustainability.

Ready to build a future proof workforce? Learn how we can help with FREE expert technical assistance, program support, and targeted incentive funding. Contact Barbara R. Murray, Executive Director, at (757) 401-8259 or brmurray.accelerate@aapa-ports.org. Visit us online at: www.accelapp.org.

ACCEraterate Apprenticeships is a USDOL-funded initiative of the American Association of Port Authorities (AAPA) to provide seaports and transportation, distribution and logistics (TDL) supply chain employers with tools, resources and ongoing support to build strong, sustainable apprenticeship programs.

DID YOU KNOW?

Apprenticeship has been proven to:

- reduce turnover and associated costs with recruiting and onboarding
- increase productivity
- eliminate skills gaps
- generate positive ROI
- create a more diverse workforce
- increase competitive advantage with a more highly-skilled, certified or credentialed workforce
- enable companies to better align human capital with work demands
