

Warehouse Worker Apprenticeship Program

Contact: Barbara R. Murray, Executive Director | 757.401.8259 | brmurray.accelerate@aapa-ports.org

With the rapidly increasing demand for faster turnaround times on business and consumer sales driven by e-commerce, warehousing and distribution centers play a critical role in our nation's economy.

A **warehouse worker apprenticeship program** can help your company ensure faster, safer, and more efficient operations as well as provide workers with industry-aligned skills and career pathway that can lead to supervisory positions such as Purchasing Manager or Warehouse/Operations Manager.

ACCElapp can help your organization develop a customized apprenticeship program to train your warehouse workers. As a U.S. Department of Labor (DOL)-approved apprenticeable occupation the warehouse worker apprenticeship model provides a 12 - 18 month hybrid program which includes foundational workplace-based training and related instruction in the following areas:

- Freight industry and warehousing orientation
- Workplace harassment
- Safety
- Hazardous materials
- Forklift operations
- Warehouse operations

ACCElerate Apprenticeship partner Americold, which owns and operates 183 temperature-controlled warehouses globally to ensure America's cold storage supply chain, utilizes registered apprenticeship to recruit, hire, train and retain its warehouse dock workers in Missouri.

Ready to build a future proof workforce? Learn how we can help with FREE expert technical assistance, program support, and targeted incentive funding. Visit our website at www.accelapp.org.

Apprenticeship is a proven, structured training model that employers can use to build a skilled, credentialed, and more diverse talent pipeline. ACCElerate Apprenticeships is a USDOL-funded initiative of the American Association of Port Authorities (AAPA) to provide seaports and transportation, distribution and logistics (TDL) supply chain employers across the U.S. with tools, resources and ongoing program support to build strong, sustainable apprenticeship programs.

DID YOU KNOW?

Apprenticeship has been proven to:

- reduce turnover and associated costs with recruiting and onboarding
- increase productivity
- eliminate skills gaps
- generate positive ROI
- create a more diverse workforce
- increase competitive advantage with a more highly-skilled, certified or credentialed workforce
- enable companies to better align human capital with work demands
